AMENDMENT

In response to the Office Action dated November 13, 2000, please  
amend the above-identified application as follows:

IN THE TITLE:

Please change the title of this application to:

~~ANTIBODIES TO HUMAN COMPLEMENT COMPONENT C5--~~

IN THE ABSTRACT:

Please amend the abstract for this application to read as follows:

The use of anti-C5 antibodies, e.g., monoclonal  
antibodies, to treat glomerulonephritis (GN) is disclosed. The  
administration of such antibodies at low dosage levels has been  
found to significantly reduce glomerular  
inflammation/enlargement and other pathologic conditions  
associated with GN. Also disclosed are anti-C5 antibodies and  
anti-C5 antibody-encoding nucleic acid molecules. These  
antibodies are useful in the treatment of GN and other  
inflammatory conditions involving pathologic activation of the  
complement system.

A copy of the original version of this abstract annotated to show the  
changes made by this amendment is attached as Exhibit A.
